

The Philosophy of Pitfalls

Michael C. Daconta
Chief Scientist, APG
McDonald Bradley, Inc.

Introduction

- 📌 Michael C. Daconta – Chief Architect, VKB
 - 🍒 Starting the MBI West Coast office!
 - 🍒 Semantic Web Book (June 2003) is my 10th.
 - 🍒 Last year – 2 books, Master's degree and a move.
 - 🍒 Time for a REST! (Riiiiiiight!)

Introduction (2)

My Great co-authors

Kevin T. Smith - Chief Security Architect

Always delivers!

Speaking at JavaOne this year!

Semantic Web book co-author.

Donnie Avondolio - NCES Development Lead

brought on after 3 previous drop outs.

Had to catch-up and delivered in the clutch!

Introduction (3)

History:

-  More Java Pitfalls. Mar 2003
-  Java Pitfalls
-  JavaWorld Columns
-  The “pitfall franchise”
 -  Jakarta Pitfalls
 -  “imitation is the highest form of flattery”

What is a Pitfall?

- Formal Definition (Java Pitfalls)
 - “A pitfall is code that compiles fine but when is executed produces unintended and sometimes disastrous results.”
- The “blessing” of compilation
 - syntax error versus logic error
- Pitfalls waste time and cause Frustration

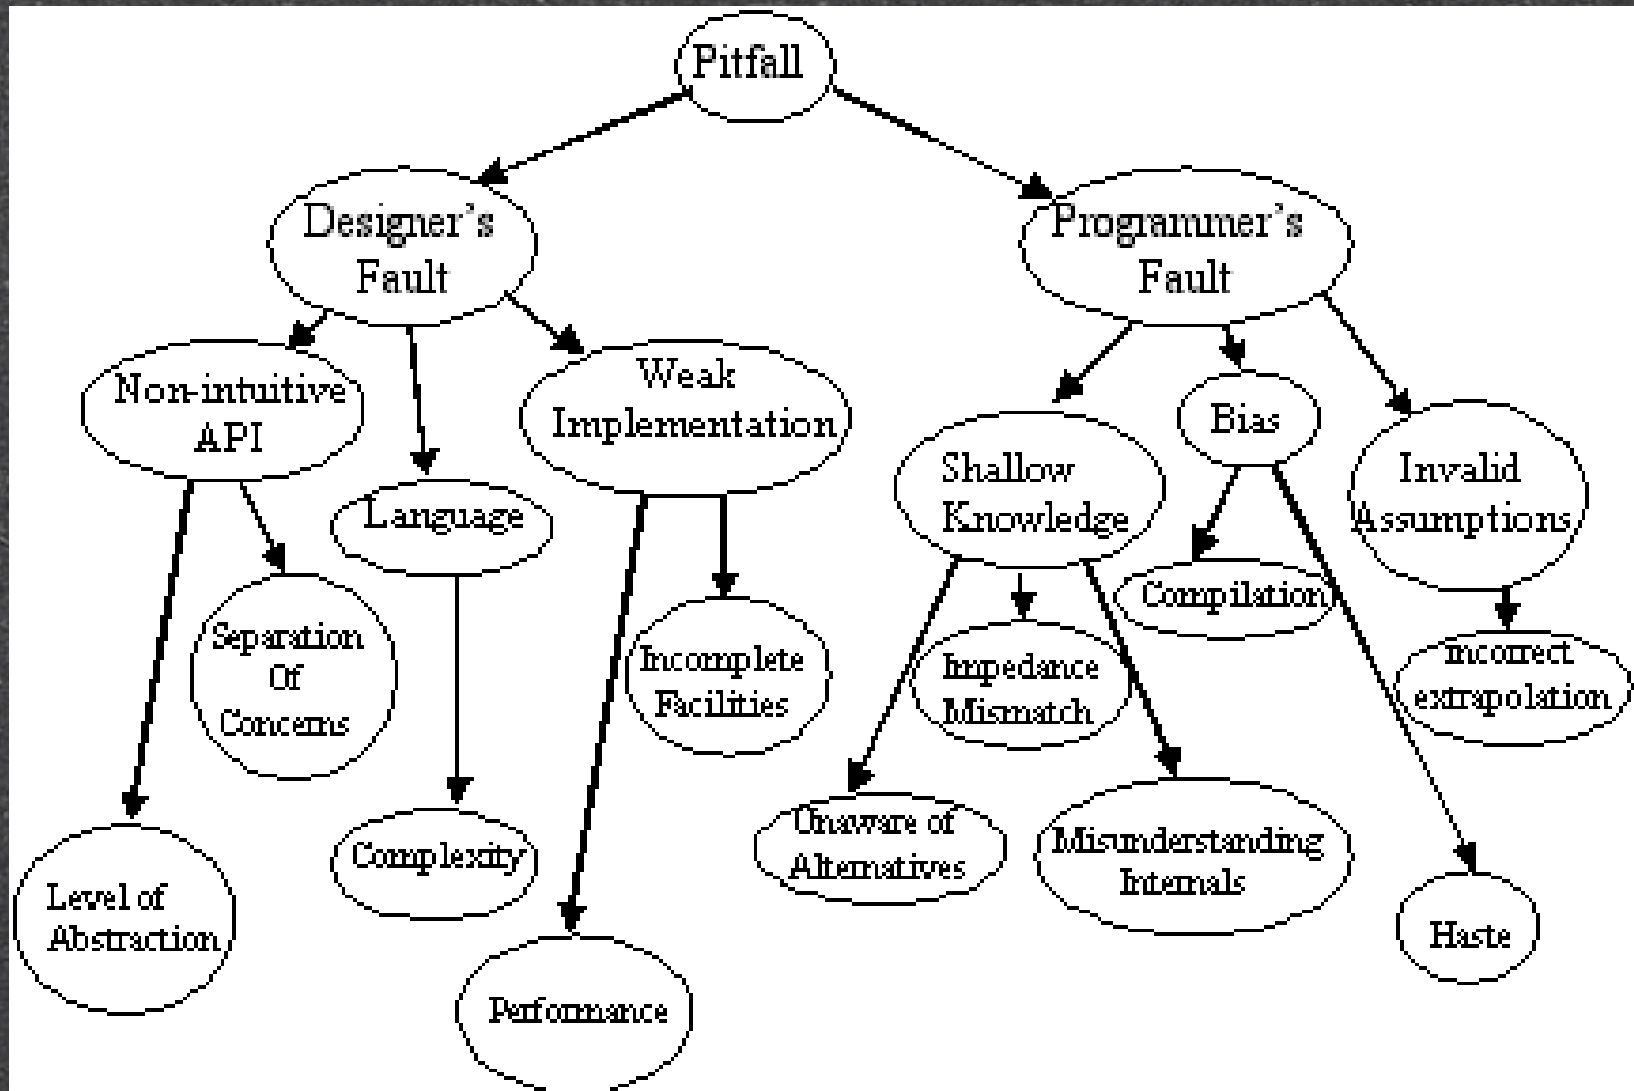

Anatomy of a Pitfall

- 📌 Symptom. Demonstrated with `BadXXX.java`
- 📌 Root cause. Figure is helpful.
 - 🔍 Shallow knowledge versus “deep” knowledge.
- 📌 Cure. Solution or Workaround.
 - 🔍 Demonstrated with `GoodXXX.java`

The Philosophy of Pitfalls

- 📌 Programming is difficult.
- 📌 This is a truth, a great truth.
 - 🌐 Mike's corollary to “Life is Suffering”.
- 📌 Why do pitfalls happen to good people? (Next slide)

The Pitfall Taxonomy

Sins of the Designer

The Art of Design

-  Walking a mile in another's moccasins
-  form follows function
-  balance of forces
 -  control, cohesion and cost

Sins of the Designer(2)

The Art of Simplicity

-  The primacy of adoption

-  Proverbial question: How to squeeze 10 pounds into a 3 pound sack?

-  Answer: make the sack appear bigger

-  Simple interface, postpone complexity, just enough control

Peer Mentoring

- 📌 Anyone can be a mentor
 - 🔴 The all-knowing bias (long white beard required)
 - 🔴 The illusion of perfect knowledge.
- 📌 Peers are the best teachers
 - 🔴 Non-threatening (fertile ground)
 - 🔴 Best way to learn, Teach!
 - 🔴 Combinatorial Experimentation

A Culture of Mentoring

- Whiteboard in every office
- Mornings with Monroe
 - Senior/junior meetings
- Corporate Wiki is a must!
 - (capture/share/create cycle)

Conclusion

- 📌 Co-author Comments?
- 📌 Next book: The Semantic Web: A guide to the future of XML, Web Services and Knowledge Management.
- 📌 Questions?
- 📌 Thanks for coming!!!
